

# **Title**

Selected Aspects of Animal Breeding at Primary Schools

## **Abstract**

Content of the work is based on my diploma thesis. It is focused on the most problematic parts of a settlement of school breeding.

The theoretical part of my thesis is based on a study of specialized literature and interview. It describes history and present state of breeding, especially school breeding.

The second part of the thesis is devoted to the basis of school breedings. First of all, there is a survey of a complicated legislation in the field of interest breeding, which discourages teachers from breeding. The next chapter contains information concerning health hazards for students, especially about allergy and phobias. That is why a special attention is focused on problems of suitable species for school breeding in the next chapter. The last chapter contains inspiration for teachers in writing of Gerald Durrell.
